

CURIOUS ABOUT  
MPV?  
(MONKEYPOX)

**Curious about MPV (monkeypox)?** While not an STI, MPV is a contagious viral disease that is currently being seen in the US, including among communities of gay, bi, trans & non-binary folks who identify as male. Local healthcare providers and government leaders are collaborating to ensure the **Provincetown** community is informed about MPV so that together we can protect each other and limit its spread.

## STAY INFORMED. STAY HEALTHY.

**For more information** - including resources for MPV vaccinations for residents of Massachusetts - as well as updates from ASGCC, Outer Cape Health Services, Provincetown Health Department, Massachusetts Department of Public Health, and the CDC, please visit:

[asgcc.org/monkeypox-information](https://asgcc.org/monkeypox-information)

**Experiencing symptoms?** Stay home & call your healthcare provider.
